IRWIN JACK

Triple-ground teeth for ultimate cutting performance
1mm rigid blade for maximum stability
Deep gullets for enhanced performance & greater volume removal of waste material (Coarse saw only)
Fine nose teeth for easy start (Universal Toolbox Saw only)
Soft-grip handle with finger guide for maximum comfort in prolonged use
Hard point teeth for longer life
High quality C75 steel blade that is stable and ensures maximum power transfer
Water based lacquer gives four times better rust protection than traditional lacquer

XPERT Handsaw PTFE Coated

The XPERT range of low-friction PTFE coated handsaws from IRWIN give between 20 to 50% improvement (material dependent) when sawing and also offer improved wear-resistance.

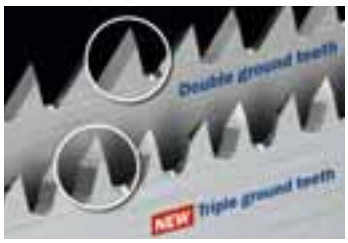
TGT TECHNOLOGY PATENTED

The ultimate cutting comfort and performance of the XPERT comes from its breakthrough patented Triple-Ground Teeth (TGT). This technology has been developed in collaboration with the research centre of the University of Newcastle. The TGT logo is the mark of quality for the new IRWIN® Jack® tooth design.

IRWIN JACK

Universal 880 Triple Ground Saw

The new IRWIN® Universal Triple Ground Tooth is designed to improve cutting performance and reflects latest market requirements.

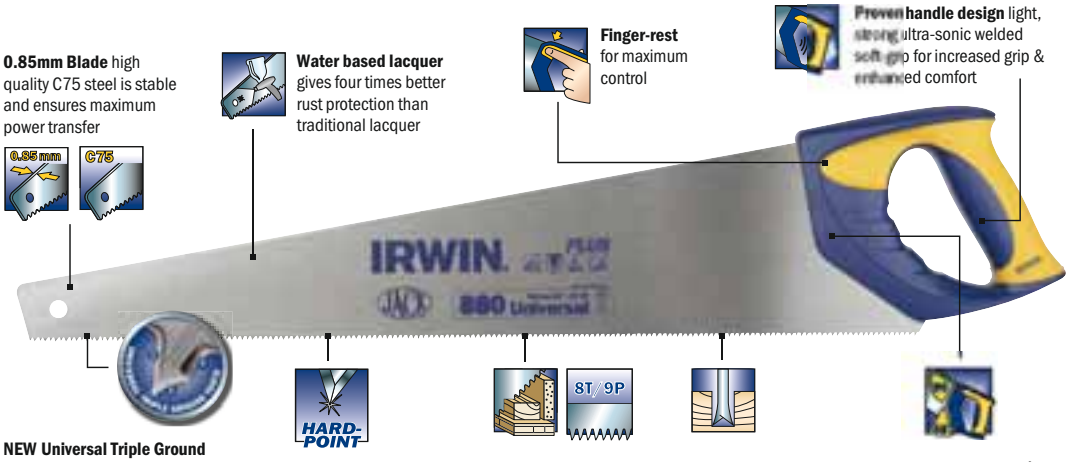


1 - Triple Ground
The new **IRWIN®** Universal Triple Ground Tooth builds on the characteristics of the compact and robust 880 Universal Double Ground Tooth

2 - Additional Ground Edge
The additional third ground edge improves cutting performance on both forward & backward strokes

3 - Increased Gullet Size
The increased gullet size facilitates more efficient saw dust removal

4 - Optimised Set Pattern
The optimised tooth set pattern delivers a smoother and more efficient cut whilst improving the ease of start



0.85mm Blade high quality C75 steel is stable and ensures maximum power transfer

Water based lacquer gives four times better rust protection than traditional lacquer

Finger-rest for maximum control

Proven handle design light, strong ultra-sonic welded soft grip for increased grip & enhanced comfort

NEW Universal Triple Ground Tooth this unique triple ground tooth design makes the new IRWIN-Jack 880 Triple Ground Saw 25% faster than the double ground version

Hardened Teeth hard point teeth (HP) stay sharp 6-8 times longer than non-hardened teeth

Universal Use tooth pitch designed to perform in multiple materials & jobs

Multi Set-Pattern optimised set pattern to help smoothness of cut & more efficient saw dust removal

Marking Angles 90˚ & 45˚ angles integrated in the handle for ease of marking out

PLUS Handsaw Range

The IRWIN Plus range gives you an extremely comprehensive choice of handsaws, with models and tooth configurations suitable for all wood cutting applications.

Bowsaws

IRWIN JACK

XPERT Bowsaw Range

IRWIN offers the complete range of bowsaws and replacement blades for pruning and garden work. Select from hard point and precision filed blades that give outstanding cutting performance, whether it's trimming storm-damaged trees, pruning shrubs, bushes or cutting firewood. IRWIN's extensive range includes the combi saw which provides extra clearance for easy cutting of pipe work - one blade for wood cutting and one for metal.

Knuckle Guard protects your fingers when sawing
Extra Strong, Soft-Grip Clasps designed for a quick & easy change of blade without tools
Bow Frame powder coated steel profile that is carefully balanced between weight and strength
Handle/Tension Lever built with 25mm free access for protection of fingers when changing the saw blade
Special Rivet that cannot fall out when changing the blade
Saw Blade precision filed saw teeth that cut in both the push and pull stroke
Hard Point 6 to 8 times longer lifetime than unhardened saw teeth

Bevels and Squares

IRWIN

Bevelled squares are used for marking out lines, testing squares and angle lengths.
Sliding bevels are used for marking angle lengths.
All measuring tools are made from aluminium block and with a steel blade. The scales are etched on the surface which ensures long durability and are manufactured according to very fine tolerances, so all IRWIN measuring tools are very precise. Edge holder for accurate positioning.

Planes and Plane Cutters

Bench Planes

IRWIN Record bring decades of experience, well proven design and advanced production techniques to produce this fine range of woodworking planes.

High-quality cast grey iron body with precision machined base
Carbon steel cutting iron
Robust lever cap has three pressure points and brass locking nut for secure location of the cutting iron
Fine adjustment is controlled by a brass adjusting nut and lateral adjusting lever
Impact-resistant ABS resin handle and knob for comfort and control

Clamps for Woodworking

One Handed Bar Clamp Family

IRWIN QUICK-GRIP

18 years ago we revolutionised the clamping industry by developing the first one-handed bar clamp under the Quick-Grip® brand. 4 years ago we launched the Quick-Grip® XP which was the world's first one-handed bar clamp, with five patents pending, specifically designed for gluing applications.

The clamp offers "Xtreme Pressure" which is two times greater than all of its competitors. Since the launch of the Quick-Grip® XP we have listened to our consumers feedback and made significant improvements to make this product truly the best one handed bar clamp on the market. Full face pads and a supporting foot have been added, plus lockable swivel jaws to ensure that both jaws are always parallel and pressure is evenly distributed when gluing.

To further enhance the IRWIN Quick-Grip® family, serious improvements have been made to the original Quick-Grip® Quick-Change™ product to improve the hold load pressure of the clamp to 135kg's of pressure plus further expand the applications which the product is able to be used for. A lockable swivel feature has been added to the jaw of the clamp which allows uneven surfaces to be clamped now with ease.

Through differentiation on the Packaging and the new Point-of-Sale materials, we help the user to choose the right clamp for the right application. This will happen by implementing a clear good – better – best range architecture, using Bronze/ Silver/Gold medals that state the average clamping force of the product.

IRWIN QUICK-GRIP XP

Maximum Gripping Strength with One Hand

4 years ago we launched the Quick-Grip® XP which was the world's first one-handed bar clamp, with five patents pending, specifically designed for gluing applications.
The clamp offers "Xtreme Pressure" which is two times greater than all of its competitors. Since the launch of the Quick-Grip® XP we have listened to our consumers feedback and made significant improvements to make this product truly the best one handed bar clamp on the market. Full face pads and a supporting foot have been added, plus lockable swivel jaws to ensure that both jaws are always parallel and pressure is evenly distributed when gluing.

Full Face Pads
Lockable Swivel Jaws
Up to two times more clamping force than other one-handed bar clamps
IRWIN QUICK-GRIP
Quick-Change™ Screw no tool required
Supporting Foot (18", 24", 36" & 50")
Free Sliding I-Beam Bar
Low-Explosive Release Mechanism
XTREME 250 PRESSURE

Quick-Change Bar Clamp & Spreader

The IRWIN Quick-Grip range has revolutionised clamping, giving users the ability to clamp faster and easier than ever before. The original Quick-Change product has now been improved to provide the consumer with a greater clamping hold load (135kg) plus a new to the market lockable swivel feature which enables uneven surfaces to be clamped.

135kg of clamping pressure
Lockable Swivel Jaw allows the even distribution of clamping pressure and also the capabilities to clamp uneven surfaces
Heat Treated Steel I-Beam Bar gives resistance to bending and wear
Improved ergonomics and design inline with the XP product
Improved Screw Quick-Change Mechanism holds the jaw firmer on the bar

IRWIN

Clamps for Woodworking

Pro Clamps

Ergonomically designed three-component handle allows the end-user a higher torque transfer to the workpiece.
A patented floating lock minimises the risk of the lower jaw sliding down the bar.
The industrial design allows the clamp to be freestanding.

Three-component handle for higher torque transfer than wood & comfort for the user (S & M Range; L Range with Tommy-bar)
I-beam / ribbed design, providing higher mechanical strength and less torsion
Patented floating lock needs less user intervention and eliminates slippage
Soft hexed handle for better ergonomics
TPE pads provide excellent friction to the work surface; reduces marking of workpiece
Zinc plated I-beam bar prevents rust and improves appearance

T136/11	T-Bar Clamp, 1980mm	0734442034568	-	1

Sash Clamps 135 Series

These are heavy duty clamps with a bar section of 32mm x 6mm (1-1/4" x 1/4").The slide and head are guaranteed unbreakable & the slide is secured by a solid steel pin passing through one of the locating holes spaced along the steel bar.

The steel mainscrew applies pressure quickly and smoothly through a fast acting, hard wearing rolled thread.
Slides and heads are flat bottomed so that the clamp will stand without support.

Item No.	Description	EAN	Master Pack	Shelf Pack
T135/4	Sash Clamp, 915mm	734442033608	-	1
T135/5	Sash Clamp, 1070mm	734442033721	-	1

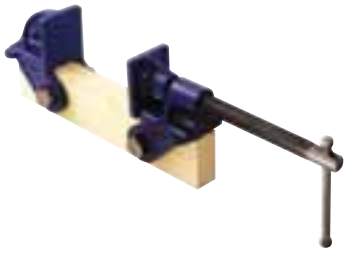
T135/9	Sash Clamp, 1680mm	734442033875	-	1



Clamp Head

Low cost alternative to full size bar clamps. The grey cast grey iron head and slide with steel mainscrew can be fitted to a wooden batten 1"/25mm thick by 1-1/2"/38mm wide and any length.

Item No.	Description	EAN	Master Pack	Shelf Pack
TM130	Clamp Head, 25 x 38mm	734442348085	-	6

Quick-Release C-Clamps

The all-purpose C-Clamp for heavy duty woodworking and medium duty metalworking jobs is equipped with a spring supported moving jaw and saves up to 75% of time against a traditional C-Clamp. Due to the moveable jaw, the length of the thread is reduced to the minimum.

Meets end-user requirements as it saves time, has a deep throat depth and we have a range of clamping depths
More versatile - the Quick-Release mechanism is in the jaw rather than the screw, meaning that there is a shorter screw, so the clamp can be used in confined spaces (patented design)
Quick-release mechanism does not compromise the clamping strength

Item No.	Description	EAN	Master Pack	Shelf Pack
10504422*	Quick-Release C-Clamp, 150mm	5706915044225	-	4
10504423*	Quick-Release C-Clamp, 225mm	5706915044232	-	4
10504424*	Quick-Release C-Clamp, 300mm	5706915044249	-	3

*While stocks last

Medium-Duty C-Clamps

These clamps have an unusually thin frame for getting into tight corners and confined spaces, and because the frame is made from drop-forged steel, they are also very strong and rigid. The steel mainscrew has a rolled, fast acting, hardwearing thread and is fitted with a steel swivel shoe to allow for use on uneven surfaces.

Item No.	Description	EAN	Master Pack	Shelf Pack
T119/2	Medium-Duty C-Clamp, 50mm	734442030508	-	6

IRWIN Record

Mechanics' Vices

Rigid and robust, the body and sliding jaw are cast from close grained grey iron which is CNC manufactured on all friction surfaces for a smooth reliable action.
The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding.

Top quality grey-iron castings
Fused steel handle will bend before the vice can be over-stressed
Fully machined on all load-bearing surfaces
Safety stop prevents the slide from being separated from the body
Unbreakable S.G. iron nut can be replaced when worn
Batch tested on both body and slide castings

Trapezoid Knives and Blades

Utility Knives

A new collection of best-in-class knives developed from intensive research on the needs of professional users. This highly innovative range meets the high standards required by today's professional users – where safety, durability, convenience, and comfort are the most important factors.

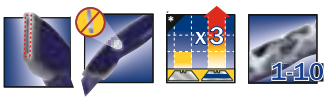
XP Retractable Knife

This impressive knife sets new standards of durability and performance. It's distinctive design features an extremely durable, and single piece stainless steel nose that eliminates spreading and resists wear. Additional features include a quick blade release to enable blade replacement without the need to open the handle, easy tool-free entry, and storage for up to 5 blades.

Item No.	Description	EAN	Master Pack	Shelf Pack
10507404	XP Retractable Knife	5706915074048	40	8

XP Fixed Knife

This compact and rugged fixed knife features an extremely durable, and single piece stainless steel nose that eliminates spreading and resists wear. Productivity is also increased with the easy no-tool entry and shielded blade storage unit that can hold up to 10 blades.



Item No.	Description	EAN	Master Pack	Shelf Pack
10507405	XP Fixed Knife	5706915074055	40	8

Trapezoid Knives and Blades

IRWIN

ProTouch Retractable Knife

A feature-rich retractable knife with a quick blade change facility for easy blade removal and reversal without opening the knife.

Other features include easy tool-free entry, smooth 3 step retraction for multiple cutting depths, convenient storage of 5 blades, magnetic blade retention, optimised cutting angle for minimal fatigue, and ProTouch for a secure grip and greater comfort.

BULK PACKS
Maximise sales using our new high impact bulk knife packs. Great for stackable counter features and shelves - each knife is individually bar-coded and comes with one blade loaded.

Trapezoid Blades

IRWIN

LONG-LASTING BiMetal TECHNOLOGY

WHY BI-METAL?

Lasts 3x longer*
MORE CUTS FOR YOUR MONEY

Universal use
IDEAL FOR MOST APPLICATIONS

Shatterproof
FOR ULTIMATE SAFETY

Trapezoid Blades

Patented Bi-Metal technology fuses two premium steels together. This creates utility blades that are exceptionally durable, shatterproof and last 3x longer*. The product of these innovative features is a utility blade that outlasts and outperforms traditional carbon blades.

Bi-Metal Blue Trapezoid Blades

Revolutionary trapezoid blade that lasts 3x longer*. The blades are shatterproof for ultimate safety, which makes them suitable for universal use in most applications.

Locking Pliers

The Vise Grip® Locking Tool was invented in 1924 by a blacksmith in a small town of DeWitt, Nebraska. William Petersen designed the first pair of Vise-Grip® pliers. Since then, Vise-Grip® has gained global brand recognition as the first choice for Locking Pliers. Innovation and quality are the core values of the Vise-Grip® brand.

All our IRWIN®Vise Grip® Locking Pliers are equipped with a hex adjusting screw on the adjustment bolt which benefits the end user by adding an additional controlled release of the tool and allows fine adjustment.

IRWIN. VISE-GRIP®

The Original SINCE 1924™

CR Range Locking Pliers

NEW

Traditional locking pliers are prone to slipping unless a significant amount of pressure is applied. The NEW IRWIN Vise-Grip Curved Jaw (CR) Locking Pliers feature a unique self-energizing lower jaw that delivers three times more gripping power than traditional locking pliers, with absolutely no slipping or stripping. The slotted geometry of the new 'self-energizing' Vise-Grip CR locking pliers exponentially increases torque for more secure clamping, and while traditional locking pliers only allow for a couple of contact points on a work piece, which can result in the tool slipping or failing to loosen a bolt, Vise-Grip CR establishes multiple contact points, guaranteeing a significantly tighter grip. As a result, the new CR range is especially well-suited for performing in greasy work environments and for manoeuvring in tight spaces where a worker cannot easily get two hands on a tool.

3X More Gripping Power*

*vs. Traditional Locking Pliers

THE STRONGEST VISE GRIP LOCKING PLIERS IN THE WORLD

Patent pending

Self-energising lower jaw pivot allows jaw to align on workpiece for maximum grip without slipping. Provides maximum grip without requiring heavy input pressure

2x longer life vs traditional locking pliers

Built strong to last long high-grade alloy steel is heat treated for maximum toughness and durability

Patented curved jaw for securely gripping multiple surface shapes including round pipes, square or hex bolts and more

Fast Release

It's a Vise-Grip Powerful brand asked for by name. Holds up under extreme conditions such as welding and hammer strikes
No pinch points Elimination of trigger means no pinching during release
Hex adjusting screw Allows for fine adjustment and additional controlled release of the tool

IRWIN VISE-GRIP

Multi-groove ratcheting system allows for precise positioning by providing more groove positions than standard groove-joint pliers
All–purpose jaw grips onto flat, round, hex & square workpieces to provide tremendous bite
Quick-adjusting press-n-slide button quickly adjusts lower jaw up to 50% faster
Anti-pinch design prevents handles from pinching
Metal Injection molding is patented technology which delivers precision and strength
ProTouch™ Grips are moulded for comfort and provide less hand fatigue

Groovelock™ Water Pump Pliers with ProTouch handle

NEW

GrooveLock™ pliers are designed with twice the number of groove positions of traditional groove joint pliers to deliver optimal hand and jaw positioning - providing a superior grip.
The specially engineered, all-purpose jaw grips round, hex, square and flat surfaces for incredible versatility.

IRWIN

Pipe Wrenches, Cutters and Vices

Pipe Wrenches

IRWIN Record offer a full range of plumbing tools designed to get the job done quickly and efficiently. From our solid-forged Stillson Wrenches to the lightweight Quick-Wrench, our range of pipe tools offer superior grip due to the unique 'V-shaped' tooth profile.

IRWIN

Quick Adjusting Wrench

Quick adjusting jaw one-handed operation enhances user's speed and convenience. Ratchets quickly to work surface. Smooth release upon job completion
Cast aluminium construction 40% less weight than standard 350mm / 14" cast iron pipe wrench. Ergonomic handle ideal for heavy torque & maximum comfort. Rivetted to heat treated steel body
Forged hook jaw 58mm / 2-1/4" jaw capacity equivalent to standard 14" pipe wrench.
Ideal for pipe diameters up to 38mm / 1-1/2".
Broached teeth are ideal for most surfaces, including black, galvanised, PVC and copper pipe, as well as nuts, bolts and couplings

IRWIN Record

Handiwrench

Chain pipe wrenches are mainly used in confined spaces, such as against a wall or close to a nest of other piping. Simply loop the chain around the pipe, lock it and the jaws will grip in the direction of the turn. The pipe can then be easily tightened or loosened with short strokes of the handle.

Bolt Cutters

IRWIN Record bolt cutters made their debut in 1923. IRWIN Record heavy-duty bolt cutters consist of two drop-forged steel handles, which open and close the jaws through a compound action. This action means that every pound of force applied to the handles is amplified to produce 80lbs of force between the jaws. The jaws are drop-forged from a special steel and machined to precise specifications. This produces a resilient body and rigid cutting edge.

Induction-hardened radiused clipping edges to prevent chipping
Easy & fail safe cam adjustment
High tensile tubular handles
Ergonomic rubber grips for any weather
Specially formulated & heat treated drop forged steel heads

Aviation and Offset Snips

IRWIN Aviation and Offset Snips have precisionformed blades for a longer cutting life; ergonomically designed over-moulded soft-grips for a perfect balance of comfort and performance in the hand, and a long-life torsion spring for a smooth and consistent cut.

Serrated lower blade for firmer action, smoother cut, and no double marked edges
ProTouch moulded soft-grips for superior comfort and control, resulting in less hand fatigue/stress
Increased length of cut for faster work
Improved balanced weight distribution for greater comfort
Drop-resistant latch for easy one-handed use, saving time & increasing safety

Tile Cutters

Professional Tile cutters DUPLEX

Cutting capacity for ceramic and tiles with maximum sizes of 50 x 50, 65 x 65 and 75 x 75 cm and 12 mm depth. Featured with a special mechanism that allows to split the tile on both horizontal and vertical positions. Replaceable double cut pin for more cuts with less cost. Aluminium carrier, and steel base with electrostatic paint finishing.

Cutting Length - up to 75 cm
Bigger breaking surface - important while breaking big tiles (wider than 50cm)
New square - easy and quick sdjustment
Two breaking positions - innovative design gives ablity to break tiles in horizontal and vertical position
Multipurposal with additionsal device can be used for hole cutting
Ergonomic handle shape

Masonry Drilling

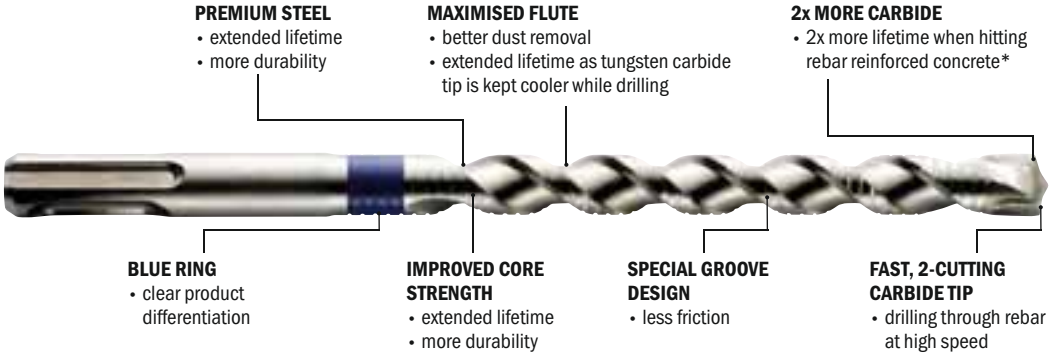
SPEEDHAMMER Power™ Drill Bits

NEW

IRWIN. joran.

Speedhammer POWER - designed for the professional!

- Longest lasting IRWIN Hammer Drill Bit ever!
- 2x more holes in rebar reinforced concrete*!
- 40% more life in plain concrete*!



PREMIUM STEEL
• extended lifetime
• more durability
MAXIMISED FLUTE
• better dust removal
• extended lifetime as tungsten carbide tip is kept cooler while drilling
2x MORE CARBIDE
• 2x more lifetime when hitting rebar reinforced concrete*
BLUE RING
• clear product differentiation
IMPROVED CORE STRENGTH
• extended lifetime
• more durability
SPECIAL GROOVE DESIGN
• less friction
FAST, 2-CUTTING CARBIDE TIP
• drilling through rebar at high speed

POWER through rebar!

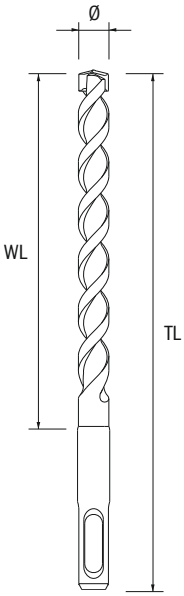
IRWIN. joran.

Designed for drilling in brick, block, masonry, concrete and granite
28% greater flute capacity removes dust really fast
Patented extra short drill bit head ensures drilling dust goes directly into the flute, reducing the risk of clogging
Self-centring for easier control when drilling starts
More aggressive cutting angles for faster drilling
25% more tungsten carbide for extra strength and versatility
Drills 25% faster than competitive drill bits and still with the same high durability
Patented high-performance carbide tip



SPEED PLUS HAMMER™

IRWIN
joran

For a wide range of applications for both SDS Plus and SDS Max hammer drills: breaking through, breaking up concrete, light demolition work and chasing of channels for pipes and electrical conduit
Application: concrete and masonry
Grey sandblasted professional finish

IRWIN joran

Designed for drilling of large diameters (35-150mm) into: Concrete, Granite and other very hard materials

Pilot drill: To easily remove the pilot drill from the drill rod, push the drift key into the slot of the drill rod

Designed for fast and easy drilling of larger diameters (30-80mm) into: Masonry, Brick, Natural stone, Autoclaved aerated concrete and Drywall/gypsum board

Pilot drill: The pilot drill is securely fixed by a set screw which can be tightened with a hex key

Core removal: After drilling, the core often gets stuck in the core drill. To make the removal easier, the lightweight core drills have a hole

Heavy Duty Core Drills

Designed for drilling large diameter holes in concrete and rock.

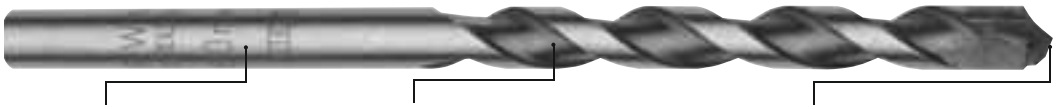
CORDLESS MULTI



CHROME VANADIUM BODY
- High carbon content allows more hardening and a stronger bit

MORE FLUTE CAPACITY
- The unique double flute has been designed with sufficient capacity to clear away the drilling dust even at low speed drilling

UNIQUE POINT GRINDING
- The brazed in carbide tip comes with a unique diamond ground 4-face design
- Extreme low drilling pressure means faster drilling and up to 100% more holes per battery charge
- Excellent centring – will not walk
- Perfect hole quality
- Long life

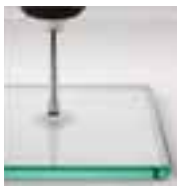
1 Drill Bit for every Need!

The Cordless drill bit is IRWIN's most versatile drill bit that will drill a wide selection of different materials - i.e. Brickwork, Ceramic Tiles, Breeze Block, Wood, Dry Wall, Limestone, Marble, Plastics etc. In addition to the multipurpose function, the Cordless is IRWIN's problem solver for drilling into ceramic tiles up to a hardness grade of 9.

IRWIN joran

GLASS & TILES

For drilling glass, bottles, porcelain, ceramics. Rotary only.



USEFUL TIPS:

DRILL WITH LOW RPM.
WATER COOLING RECOMMENDED.
NO HAMMER ACTION.

Diamond Drill Bits

NEW

For fast smooth cutting in all grades of hard and soft tile. Rotary only.

DIAMOND

The drill needs to run before hitting the surface. To avoid sliding of the drill, start with an angle of 45°

Once the hole has started, raise the drill gradually up to the vertical line

Make an oscillating movement while drilling

USEFUL TIPS:

MAKE A SWINGING MOVEMENT TO ALLOW DUST EVACUATION.
DO NOT PRESS STRONGLY ON THE TOOL, LET IT WORK.
DRILLING WITH WATER INCREASES THE LIFESPAN OF THE TOOL.
SHARPENING REFRESHES THE CUTTING POWER OF THE TOOL.
CUTTING SPEED : WATER SUPPLY : 2700 RPM.
NO HAMMER ACTION REQUIRED

Mortar Rakes

The IRWIN Joran mortar rake is a tungsten- carbide tipped power tool accessory for the fast and efficient removal of mortar and cement joints in brickwork (to be used with a small angle-grinder). Please note that the cutters must be used together with an adapter (10507234)

IRWIN

Ground Quality
Manufactured to DIN 338 Standards
Cylindrical Shank
Packaged in PVC Tube
135° split-point grinding ensures perfect centring
Titanium Nitride coating reduces friction and resists wear
Increased drill speeds of 40-60% faster drilling speed compared to traditional bits

Auger Drill Bits - Standard Length

Bit Style	Size Range	Typical Trades	Application benefits
I-100 Solid Center Auger Bit	5mm to 40mm diameter 150mm to 400mm total lengths	Carpentry Electrical Plumbing General Building Public Utilities	Repetitive cutting of fast clean holes with a clean exit hole. Single spur cutting edge scribes the circumference of the hole for a smoother finish

Solid centre provides extra rigidity while boring
Single spur tip scribes the hole for a smoother finish
Self-feeding screw point provides faster boring in both soft and hard woods
Hex shank prevents bit slipping in chuck
Fully hardened body from tip to shank for extra durability

Brad point tip provides accurate positioning for starting the hole
Bit is precision ground for use in furniture making, doweling, cabinetry and other woodworking applications where an exact hole size is required
Spur cutting edges reduce splintering and ensure a smooth, clean hole
Wide flutes provide a fast, continous flow of chips

Screwdriver Bits

IRWIN Insert Bits are engineered for use in hand-driving applications or with power tools when used with the IRWIN Insert Bit Holder.

IRWIN Power Bits are specifically designed for the higher torque requirements of power tools. They are designed to provide more clearance between the power tool & the fastener.

Professional Circular Saw Blades

The IRWIN range of Circular Saw Blades are designed tough for the every day demands of the professional. A blend of precision design and engineering, exacting tolerances and unparalleled production quality is what makes IRWIN Circular Saw Blades last far longer than conventional blades.

Professional Wood Circular Saw Blades

Alternate Top Bevel tooth grind (ATB). Optimised for wood cutting

Heat treated blade for extra strength with a hardness of 39 - 45 HRC
Expansion slots to dissipate heat and reduce warping
Industrial grade Tungsten Carbide Tips retain their edge longer and are resharpenable up to 25 times
Corrosion resistant coating for longer quality performance
Alternate Top Bevel tooth grind (ATB) for cross cutting and ripping in all woods

Complying with EN 847-1

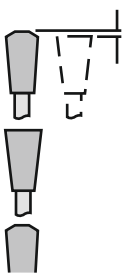
IRWIN

Professional Aluminium Circular Saw Blades

Specially designed for cutting all types of non-ferrous metals such as aluminium, copper, lead and plastics.

Hard body blade, hardness 40 - 45 HRC
Negative cutting angle
Flat Top / triple chip grind toothing
Polished, blasted and lacquered blade finish, with K20 quality Tungsten Carbide Tips
Expansion Slots help keep the blade flat

Complying with EN 847-1



Triple Chip tooth grind combined with flat tooth for excellent finish of the cut

Professional Multi-Cut Circular Saw Blades

Extra robust Circular Saw Blades designed for cutting non-ferrous metals and wood with nails.

Hard body blade, hardness 39 - 45 HRC
-1° - 4° Cutting angle
Flat top tooth grind Less aggressive compared to ATB – stronger and more suitable for cutting harder materials
Anti kick-back shoulder design for safer and more comfortable sawing
Expansion slots help keep the blade flat

Complying with EN 847-1

Flat top grind
Higher resistance against concrete remainder or metal particles like nails.

Professional Cordless Circular Saw Blades

The thin kerf blades are specifically made for cordless circular saws.

Hard body blade, hardness 42 - 48 HRC
Extra thin blade means easier cutting and more cutting per battery charge
Alternate top bevel with Anti-Kick Back
Polished, blasted and lacquered blade with K20 quality Tungsten Carbide tips
Expansion slots help keep the blade flat

Complying with EN 847-1

Alternate Top Bevel tooth grind (ATB) with anti kick-back shoulder. Optimised for wood cutting.

Diamond Discs

The IRWIN Diamond Disc offering includes the right disc for every applicatiion from rough and aggressive cutting of natural stone to precise cutting of ceramic tiles. The whole range is complying with the DIN EN 13236 standard.

Turbo Diamond Discs

Perfect for clean, precise cutting
Ideal for bricks, ceramic tiles, concrete and other construction materials
Ensure better speed and accuracy then segmented discs

Item No.	Description	EAN	Master Pack	Shelf Pack
10505924	TURBO 115mm / 22.2mm	5706915059243	50	1
10505925	TURBO 125mm / 22.2mm	5706915059250	50	1

Reciprocating Saw Blades

This comprehensive reciprocating saw blade offering has a blade for every application. IRWIN blades offer superior construction & design making them faster cutting and longer lasting, therefore giving the user a superior cost-per-cut value.

The IRWIN reciprocating range includes colour-coded packaging and labeling on the blade to easily identify the right blade for the right application.

IRWIN®

WITH WELDTEC™

Improved tooth configuration
Faster Cut: Up to 50% faster vs. prior model
Available in: 10, 14, 18 and 24TPI on metal cutting recips
Cuts all metals including non ferrous, pipe conduit, stainless & sheet metal
Suitable for use with materials 1.5 to 10mm (1/16" to 3/8") thick, dependent on the TPI of the blade
Available in 10, 14, 18 & 24 TPI in 100, 150 & 200mm (4", 6" & 8") sizes

LONG-LASTING BiMetal TECHNOLOGY®

Cuts composition materials such as plastic, wood, pipe, carbon steel & stainless steel
Suitable for use with materials 3.2mm (1/8") & thicker
Available in 10 TPI in 150, 200 & 300mm (6", 8" & 12") sizes

Reciprocating Saw Blades

IRWIN

Nail-Embedded Bi-Metal Reciprocating Blades, **2 Piece Pack**

Cuts nail embedded wood
Suitable for use with materials 5mm (3/16") & thicker
Available in 6 TPI in 150, 225 & 300mm (6", 9" & 12") sizes

Jigsaw Blades

IRWIN

This comprehensive jigsaw blade offering has a blade for every application. The range includes both T-shank and U-shank to fit all of today's most popular jigsaw power tool machines.
IRWIN Jigsaw Blades are manufactured from the following high quality materials:
HCS Carbon steel for use in softer materials such as wood, laminated chipboard, and plastics.
HSS Fully hardened high-speed steel for use in metal, aluminum, and non-ferrous metal.

Wood Cutting HCS Jigsaw Blades - T-Shank, **5 Piece Pack**

3 Sided, fleam ground teeth for fast cut and clean finishes
Fast and smooth cut in all wood applications
